After much discussion, based on the results of our PLC audit, the goal that we decided on for the BLT is:

Recognizing the need to foster an environment where academic achievement is valued and admired by our young adolescents, we intend to improve achievement for all students through implementation of interventions, including peer tutoring, diverse enrichment activities, and required after-school attendance on an as-needed basis.

We have set up another meeting for 10/22/07 to complete the School Improvement Plan for a November 1 submittal date to the District Steering Committee. It was agreed that each BLT member would come prepared to discuss the plan. In preparation for that meeting, the following would be contemplated prior to next meeting:

- Project title
- Summary of Plan
- Timelines and responsibilities within each phase of the plan
- Methods of assessing project
- Project beginning and end dates
- \$1800—how are we going to spend it?

Respectfully submitted,

Brian Fried
