September 2018

Philip D'Angelo Jr., Superintendent of Schools
Millbrook Central Schools
PO Box AA
Millbrook, NY 12545

Greetings, educators!

As you begin a new school year, all of us at Central Hudson would like to remind you that the Kids’ Corner section of our website (www.CentralHudson.com) offers educational resources for students and teachers at all grade levels.

You will find lesson plans, games, activities and links to other sites where students can learn about energy – electricity, natural gas, renewables and alternate fuel types – and how to use energy safely and wisely. We also have a link for exciting science fair experiments.

Here are a few examples of what you’ll discover at our Kids Corner:

**Energy Ant**
Learn about the various ways we use and produce energy, the different fuels used to make electricity, and how alternate forms of energy are used every day.

**Be an Energy Star**
A bright, interactive site with fun facts for kids and energy-saving ideas and activities for everyone.

**NASA Games**
Explore the Earth, sun, science and technology and more at NASA’s Space Place page, and learn about how the Global Positioning System (GPS) works!

These and all the many other resources at www.CentralHudson.com/Kids are free, and we encourage you to share this information with those who are in a position to talk to students about energy safety.

Have a safe and successful school year!

Christopher M. Gregory
Director of Corporate Communications
